Assignment - 1

Sample business Requirements Documents Template.

* Problem:-

Many of the students travel to the college or school through school or college bus. So they face many problems in their day-to-day life. Such as there is no accurate time of bus to reach at stop. Sometimes it comes earlier or late at stop, so student didn't come to know whether the bus has gone or it's coming and it is also difficult for the bus uncle and drivers to keep details of every student.

⇒ Executive Summary Snapshot:-

- After analyzing everything we had found that we need to develop an application for the students who travel's through bus to school & colleges which contain gps tracker which can track location of bus and information of every student so that it will become easy to drivers to keep information of every student.
- After researching we found that many students are struggling due to irregular timing of bus.

- The scope of this project is to make the work of student's, bus uncle & drivers easier and to help out them in their problems.
- The proposed process allows us to make an application for all school, colleges bus student only.

2) Project Description :-

- The current solution for this problem is to make an application which can be used by bus drivers, student & their parents also.
- As our main moto is to make an application for the students who travel by bus presents the following challenges.
- Such as we need to collect the data of total student's which travels through bus.
- need to take more information about busses from the drivers.
- need to take information about how many bus goes through the same root.
- how much time does bus requires to reach at college.

- Why to take this project?
- It will make student and as well as bus drivers work more & more easier.
- As student can also track the location of bus through this application & will reach at time at their stop.
- For uncle's it will be more easy to keep information of student who had paid fee or not through this application.
- Sometimes student loss their pass if it will be given online through this application then there will be no need to carry offline pass.

3) project scope.

- Specific goals :- We have to take information of each and every student such as medical issues etc.
- The main goal is to make the work of bus uncle's more easy instead of keeping written information of every student they can keep online data of every student.
- Tasks :- our real task is to create an user friendly application.
- Ensure the security and to get the correct data.

- Costs :- we will discuss first how much money will require for this application with our teammembers and then declare the cost.
- Deadline :- After discussing with our team members, technical members we will provide a deadline to the customer.
